Subject: Microsoft Settlement

Dear Judge,

I am a concerned citizen voicing my negative feelings about the proposed settlement with Microsoft. Our nation's sense of fair play and honest competition have been the fuel that propelled us to the status of world leader during the industrial, space, and now technology dependent age. Microsoft has played a large part in advancing technology and deserves all the credit for this. However, it does not give them the right to violate the rules set in place to advance new innovations and ensure a healthy economy that relies on competition. Please, do your part in protecting the rights of fair play.

Thank you for your time,
God bless,
William J. Worden, DDS
